swixIO

1st

A.I. tool made in Switzerland

History

Keep track of your datasets activities

Dataset Creation

Create and manage all types of datasets

Autolabeling

Autolabel or manual assignl labels to files

Text, Images, Audio

Create and annotate sets of various types

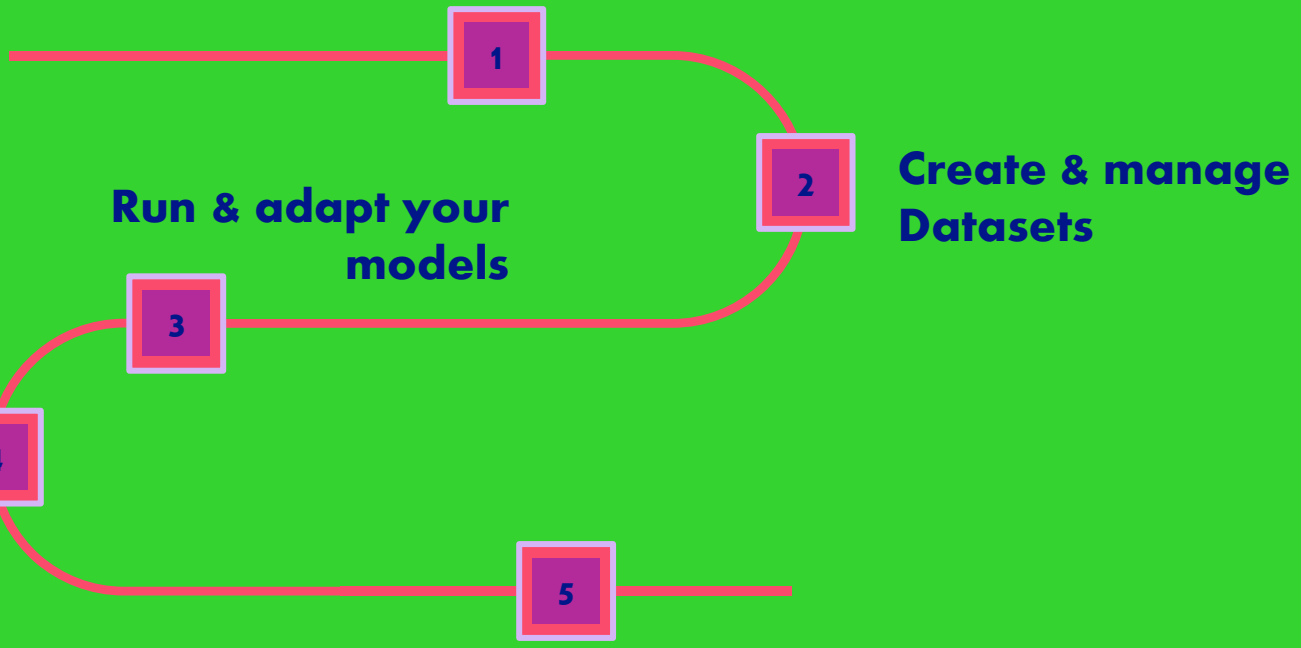
Check Diffs

Check before and after the model training for differences in labelling. Increase your model confidence factors

Export

Export Labeled datasets in various files (JSON, plain, CSV etc)

A.I. Journey



Find the right data for your model.
1
2
Create & manage Datasets
Run & adapt your models
3
4
Re-configures sets and re-train.
5
Integrate & Deploy to your application

All in one
